Do Not Send In With Your Registration.

House League:

All teams will play a 10 game schedule at Munson Park beginning September 11 and concluding on October 23, . The MASA league is recreational—your child cannot play below his/her birth year bracket. Your child's coach will determine when, where, and how often practices are to be held. Coaches receive their final rosters on August 24 and will notify players during the following week. All players receive a team jersey. NOTE: MASA has no control of Rainouts or Forfeits.

Kids Camp Educational League:

Come introduce your 3/4-year old to soccer! Each player gets his/her own ball and jersey as well as a fun/non-competitive approach to learning the skills and rules of soccer.

Interested in playing travel soccer?

If you are looking for a more competitive game and you possess the necessary skills, travel soccer may be your best option. For more information call Scott Chaffin at 734-652-0139 A position on a team is not guaranteed. The number of qualified coaches will determine the number of players accepted.

Referees:

If you are interested in being a referee for the MASA, please contact MASA line 734-243-2666 . Training and ongoing support is available for these paid positions.

The future looks great for MASA now that we are using the new fields at Munson Park and a quickly growing roster of energetic and talented players. However, nothing can go forward without your help. A **BIG THANKYOU** goes out to every person who has volunteered his or her time to make each season our best season.

Please read over your application. If it's not complete you will receive one call letting you know. You must come and complete the application or your child won't get registered. If your check hasn't been cashed, your child is not registered. You need to call the Registrar at 243-2666. **PLEASE ONLY MAKE OUT ONE CHECK PER FAMILY. ONE CHILD PER APPLICATION.**

Coaches Clinic: (For Coaches ONLY)

The coach's clinic and equipment (balls, shirts) pick up for the Fall 2021 season will be held on Saturday August 24, 2021, 12-2 at the MASA Club House at Munson Park, This is a great way to learn effective coaching, soccer drills and team-building techniques. If you are unable to attend call MASA 734-243-2666.

Concussion forms: if you have filled one out with us in prior years you don't have to fill one out again.

PARENT & ATHLETE CONCUSSION INFORMATION SHEET

WHAT IS A CONCUSSION?

A concussion is a type of traumatic brain injury that changes the way the brain normally works. A concussion is caused by a bump, blow, or jolt to the head or body that causes the head and brain to move quickly back and forth. Even a “ding,” “getting your bell rung,” or what seems to be a mild bump or blow to the head can be serious.

WHAT ARE THE SIGNS AND SYMPTOMS OF CONCUSSION?

Signs and symptoms of concussion can show up right after the injury or may not appear or be noticed until days or weeks after the injury.

If an athlete reports one or more symptoms of concussion after a bump, blow, or jolt to the head or body, s/he should be kept out of play the day of the injury. The athlete should only return to play with permission from a health care professional experienced in evaluating for concussion.

DID YOU KNOW?

- Most concussions occur without loss of consciousness.
- Athletes who have, at any point in their lives, had a concussion have an increased risk for another concussion.
- Young children and teens are more likely to get a concussion and take longer to recover than adults.

SYMPTOMS REPORTED BY ATHLETE:

- Headache or “pressure” in head
- Nausea or vomiting
- Balance problems or dizziness
- Double or blurry vision
- Sensitivity to light
- Sensitivity to noise
- Feeling sluggish, hazy, foggy, or groggy
- Concentration or memory problems
- Confusion
- Just not “feeling right” or is “feeling down”

SIGNS OBSERVED BY COACHING STAFF:

- Appears dazed or stunned
- Is confused about assignment or position
- Forgets an instruction
- Is unsure of game, score, or opponent
- Moves clumsily
- Answers questions slowly
- Loses consciousness (even briefly)
- Shows mood, behavior, or personality changes
- Can’t recall events prior to hit or fall
- Can’t recall events after hit or fall

James K. Haveman, Director

▶ **“IT’S BETTER TO MISS ONE GAME
THAN THE WHOLE SEASON”**

CONCUSSION DANGER SIGNS

In rare cases, a dangerous blood clot may form on the brain in a person with a concussion and crowd the brain against the skull. An athlete should receive immediate medical attention if after a bump, blow, or jolt to the head or body s/he exhibits any of the following danger signs:

- One pupil larger than the other
- Is drowsy or cannot be awakened
- A headache that gets worse
- Weakness, numbness, or decreased coordination
- Repeated vomiting or nausea
- Slurred speech
- Convulsions or seizures
- Cannot recognize people or places
- Becomes increasingly confused, restless, or agitated
- Has unusual behavior
- Loses consciousness (even a brief loss of consciousness should be taken seriously)

WHAT SHOULD YOU DO IF YOU THINK YOUR ATHLETE HAS A CONCUSSION?

1. If you suspect that an athlete has a concussion, remove the athlete from play and seek medical attention. Do not try to judge the severity of the injury yourself. Keep the athlete out of play the day of the injury and until a health care professional, experienced in evaluating for concussion, says s/he is symptom-free and it's OK to return to play.
2. Rest is key to helping an athlete recover from a concussion. Exercising or activities that involve a lot of concentration, such as studying, working on the computer, and playing video games, may cause concussion symptoms to reappear or get worse. After a concussion, returning to sports and school is a gradual process that should be carefully managed and monitored by a health care professional.
3. Remember: Concussions affect people differently. While most athletes with a concussion recover quickly and fully, some will have symptoms that last for days, or even weeks. A more serious concussion can last for months or longer.

WHY SHOULD AN ATHLETE REPORT THEIR SYMPTOMS?

If an athlete has a concussion, his/her brain needs time to heal. While an athlete's brain is still healing, s/he is much more likely to have another concussion. Repeat concussions can increase the time it takes to recover. In rare cases, repeat concussions in young athletes can result in brain swelling or permanent damage to their brain. They can even be fatal.
